### **DETAILED ACTION**

1. The finality of the previous office action has been withdrawn due to an error made by the examiner in the interpretation of the claim language. The argument provided by the applicant has been entered on 12/12/07, however is moot in view of the current office action due to the new matter claimed in amendment entered on 3/27/2007. Claims 1-24 are currently pending in the application.

#### *Specification*

2. The disclosure is objected to because of the following informalities: Claim 1 recites "the game machine including a **photographing request input device**, the game machine further including an **indicator** responsive to..., a **portable device** including a display for visually displaying results data representative of the result of the game, said **portable device** being **accommodatable** on a person..." the limitations as it is written in the claims are not supported / found in the specification.

Appropriate correction is required.

#### *Claim Rejections - 35 USC § 112*

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites "the game machine including a **photographing request input device**,

the game machine further including an **indicator** responsive to..., a **portable device** including a display for visually displaying results data representative of the result of the game, said **portable device** being **accommodatable** on a person..." the limitations as it is written in the claims are not supported / found in the specification.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recite "said portable device being **accommodatable** on a person", the examiner can not find the supported sections in the specification to understand the word "accommodatable", neither is the word found in the Merriam-Webster nor any other dictionary provided to the examiner. The applicant is respectfully requested to provide a copy of the definition of the word "accommodatable" in order for the examiner to understand the full meaning of the claim language.

#### *Claim Rejections - 35 USC § 103*

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al. (US 2002/0196342 A1).

The teachings of Walker have been previously discussed in the office action dated 6/12/2007. The claim as best understood by the examiner is not explicitly taught by Walker, specifically walker does not explicitly teach the use of a portable device including a display for visually displaying result data representative of the result of the game, said portable device being *accommodatable* on a person of the player such that said display is visible within a field of the image of the player when said image is taken by said photographing apparatus. However, walker does teach that multiple portable type of computer, such as a laptop computer, palm-top computer, hang-held computer, persona digital assistant (PDA), a game device, or combinations therefore are used for documenting various events as it occurs in the casino (¶ 52). Walker teaches that the winning results are documented and incorporated into the audiovisual recordings on (page 2, ¶ 23 – 26). It would have been an obvious design choice for one of ordinary skill in the art to photograph one of these portables devices with the player instead of incorporating the digital image of the documentation into the audiovisual as it accomplishes the same effect with or without the actual display device.

The limitations of claims 2-24 have been discussed in the previous office action dated 6/12/2007 and will not be repeated herein.

*Conclusion*

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
